

Challenges with posting in the construction industry

Experiences from a Polish and a German point of view

2. online (ZOOM-) workshop
18.01.2022 - 10-12 h

Registration: www.soka-bau.de/yes-project

Languages of the webinar: German + Polish + English

The workshop will take place in the framework of the YES project: The YES project is an EU project led by the Italian social fund CNCE. It investigates the situation of workers in the construction industry with regard to cross-border posting. The project forms the basis for further development of knowledge regarding posted workers in the EU. The aim is to promote existing transnational cooperation. On the one hand, the main focus is on the access to information regarding the posting. On the other hand, the focus is on promoting the posting of young people.

The workshop is intended to facilitate a discourse in order to verify the interim results obtained in the project or to be able to question them again. We cordially invite you to join the discourse and to enrich it with your practical experience.
